DRESS REGULATIONS

FOR THE ARMY,

1911.

PART I.—GENERAL INSTRUCTIONS AND ORDERS OF DRESS.

1. Commanding officers are forbidden to introduce or to sanction any deviation from the sealed patterns of dress, clothing, equipment and badges. They will be responsible for the cost of replacing or restoring to the approved pattern any articles worn in their units which may be found not to be in conformity therewith.
2. When obtaining uniform and equipment, officers should make sure, by personal comparison if possible, that articles according to sealed pattern are being supplied.
3. Sealed patterns of garments, buttons, lace, embroidery, badges of rank, special badges, devices, horse furniture and appointments are deposited at the War Office for reference and guidance, and duplicates of the sealed pattern badges are in possession of officers commanding regiments, battalions, and infantry depôts.
4. No unauthorized ornament or emblem is to be worn when in uniform, but special emblems may be carried on the headdress on anniversaries, provided authority has been obtained.
5. In Irish regiments all ranks are authorized to wear a sprig of shamrock in their headdress on St. Patrick's day. This emblem may also be worn on that day by Irishmen serving in other units.
6. Officers on leave from abroad are to be in possession of uniform for use if detailed for duty in this country or on the return voyage. Officers while in foreign countries are not to wear uniform without having obtained the permission of His Majesty's representative, which will only be granted when they are employed on duty, or attending Court, or at state ceremonies to which they have been invited. Permission to wear uniform at foreign manœuvres can only be obtained from the War Office.
7. Officers on leave from, or under orders for, stations abroad, may wear the foreign pattern headdress.
8. Regulation uniform must not be worn at fancy dress balls, but there is no objection to military uniform of obsolete pattern being worn on such occasions.
9. Uniform will be worn while on duty; it is left to the discretion of the senior officer in a garrison to permit plain clothes to be worn when not on duty.
10. Officers attending manœuvres, field training, camps of exercise, and experiments at schools of instruction are to wear uniform.

43. Shoulder Cords or Shoulder Straps.—Shoulder cords or shoulder straps, except where otherwise provided, are worn on tunics, doublets, jackets, frock-coats, and greatcoats. A description is included in that of the garments on which they are worn.

44. Spurs—Steel.—With butcher boots, jack spurs with straps, buckles and chains. With Wellington boots, box spurs with plain rowels. Spurs will be worn in full dress and service dress by all officers whose duties require them to be mounted. At levees, on ceremonial occasions dismounted, in undress, and in mess dress, spurs will be worn by general officers, staff officers, officers of mounted services, and by field officers and adjutants of infantry and of all other services, corps, and departments. They will not be worn on board ship when travelling, or by officers inspecting armaments or magazines.

45. Straps.—Whenever spurs are worn with trousers, foot straps are to be worn also.

46. Swords and Scabbards.—The pattern laid down for the arm of the service. Swords will be carried on parades and duties unless otherwise directed. They will not be worn on board ship, at mess, or at stables.

Swords will be carried on the saddle by mounted officers in all mounted "orders of dress" other than "review order."

The scabbards of officers of dismounted units in "review order" are to be hooked up by those who wear the waist belt over the tunic and carried in the left hand by other officers.

The scabbards will be carried in the left hand by mounted officers when on dismounted duties.

47. Sword Knots.—Worn loose by mounted services in all orders of dress. Dismounted services wear the sword knot neatly coiled round the guard of the sword except with the "Sam Browne" belt, when it is worn loose.

48. Ties.—Black ties are worn with mess dress, except by officers of the Oxfordshire and Buckinghamshire Light Infantry who wear white ties.

49. Trousers and Pantaloon.—For mounted officers trousers or overalls should be cut straight, and from 1½ to 2 inches longer than ordinary trousers. They should be strapped firmly down to the boot and fit closely above the spurs. In mess dress, overalls are worn by all officers except Foot Guards.

Pantaloon should be cut loose in the thigh and tight at the knee. Ample length from the hip to the knee is essential so that the wearer can have the necessary freedom in mounting and dismounting. They should have buckskin strapping at the knee, and, if made for hard wear, seat strapping also.

Pantaloon should be furnished with a waist strap and buckle and with cross pockets.

50. Waterproof.—Atholl grey for General Officers, Colonels and Officers who wear the Atholl grey great coat. Drab mixture for all other officers. Single breasted "Inverness," whole back with centre slit, hole and button; five bone buttons down the front; cape, four bone buttons; cross pockets patched on inside with flaps; sword slit at left side; three-inch turn down collar with detachable tab; two long body straps, crossing over chest and fastening with hole and button at waist behind; two short straps with holes and buttons to support garment when rolled on shoulder; arm slings sewn down in cape; leg slings to button inside skirts in front. Length to vary according to height of wearer.

The provision of this garment is not compulsory, and its wear is not obligatory in any order of dress, neither is it intended that the sealed patterns must be rigidly followed as regards material or proofing process. The patterns are sealed as a guide to shape, colour and general appearance.

51. Whistles.—There is no sealed pattern, but all the officers of a unit should carry the same pattern. They will be attached to a lanyard of the colour of the service dress and carried in mounted services, when on duty with troops; in dismounted services, when in marching or in drill order.

52. For the convenience of officers, articles of clothing and necessities as supplied to warrant officers and non-commissioned officers and men, also materials of army pattern, can be supplied from the Royal Army Clothing Department on payment.

The rules under which these issues can be made will be found in the Clothing Regulations.

53. Officers are permitted to draw from the Army Ordnance Department on payment, any arms, accoutrements, or saddlery, of service patterns which form part of their regulation equipment and which they may require for their personal use, *see* Equipment Regulations.

DECORATIONS AND MEDALS.

54. Method of wearing.—Worn on the left breast of the full-dress garment, over the sash in Highland and Scottish regiments, and under the pouch belt where this is worn. They are to be worn in a horizontal line suspended from a single bar or buckle, which is not to be seen, or stitched to the garment, and placed midway between the first and second buttons from the bottom of the collar, in Hussar regiments immediately below the top bar of lace on the left breast of the tunic.

Medals are worn in the order of the dates of the campaigns for which they have been conferred, the first obtained being placed farthest from the left shoulder.

Medals awarded by the Royal Humane Society will, when authorized, be worn, in a position corresponding with war medals, on the right breast.

When the decorations and medals cannot, on account of their number, be suspended from the bar so as to be fully seen, they are to overlap.

Medals are to be worn so as to show the Sovereign's head.

The first earned clasp should be worn nearest the medal.

55. Miniature Decorations and Medals.—Worn with mess dress and with evening dress (plain clothes) on State, public, or official occasions. To be worn on the lapel in one horizontal line.

Miniature decorations will be of the same size as miniature medals. A Knight Grand Cross, Knight Grand Commander, Knight Commander, or Commander will wear the miniature of the companionship or membership of the order. When the miniatures of the order of the Bath or of St. Michael and St. George are worn by a Knight Grand Cross or by a Knight Commander, the buckle will be omitted.

The miniatures of companionship or membership of an order will not be removed when in evening dress (plain clothes), the broad riband, star, or badge is worn by a Knight Grand Cross, Knight Commander, &c.

56. Ribands of Decorations and Medals.—

Full dress:—The riband is not to exceed 1 inch in length unless the possession of clasps requires it to be longer. The uppermost clasp to be 1 inch below the top of the riband. The buckles attached to the ribands of the third class of the orders of the Bath, and St. Michael and St. George, should show half way between the upper and lower edge of the riband.

Undress:—Ribands will be $\frac{3}{4}$ -inch in length, and will be sewn on to the cloth of the coat or jacket, or with white or khaki uniform worn on a bar without intervals, in the same position as prescribed for decorations and medals. They should not overlap, and when there is not sufficient room to wear the ribands in one row they should be worn in two or more rows, the lower being placed half-an-inch below the upper. Ribands are not to be worn with the pea jacket.

The stars of foreign orders will be worn on the right or left breast according to the regulation laid down by the Sovereign by whom they are conferred.

In foreign countries British officers will wear their stars when foreign officers wear theirs.

58. Ribands and Badges of Orders.—On State occasions Knights Grand Cross and Knights Grand Commanders of any British Orders except the orders of the Garter and of the Thistle, will, when in review order or in evening dress (plain clothes), wear the broad ribands of the orders over the right shoulder, and under the sash or belt. The ribands of the orders of the Garter and the Thistle are worn over the left shoulder. Knights Commanders and Commanders will, when in review order, or in evening dress (plain clothes) wear the ribands of the order inside the collar of the tunic or coat, the badge being suspended two inches below the lower edge of the collar. Badges of orders are not to be worn except as above.

In review order Knights Commanders of two or more orders will wear round the neck the riband and badge of the senior order, and may also wear the ribands and badges of one or more of the other orders. In evening dress (plain clothes) only the ribbon and badge of the senior order will be worn.

On collar days the Knights Grand Cross and Knights Grand Commanders of the several orders wear the collar and badge and the star. The collar is worn under the shoulder cords and over the aiguillette. It is fastened to the shoulder cords by bows of white satin riband, $1\frac{1}{2}$ inches wide, and arranged so as to hang equally at back and front. When the collar is worn, the ribands and badges of the same order will not be worn. The collar is never worn after sunset. APPENDIX II.

CARE AND PRESERVATION OF UNIFORM.

Care and preservation of uniform and of gold lace.

Articles of uniform liable to be moth-eaten should be unfolded at intervals and well beaten and brushed in the open air. Russia leather parings, powdered camphor, naphthaline, carbolized paper, or turpentine sprinkled on brown paper, or on the garments, are good for the prevention of moth, and one or another of these preventatives should be placed amongst articles of uniform which are to be packed away for any time.

Before being packed away, gold lace, braid, cord, or buttons on garments should be covered with tissue paper, and then placed in tin-lined air-tight cases. Care must be taken to use paper that is thoroughly dry. For the prevention of moth, the garments should be well aired and brushed before being packed.

Gold trimmings and gold lace that have become slightly tarnished can be cleaned with a mixture of cream of tartar and dry bread rubbed up very fine, applied in a dry state, and brushed lightly with a clean soft brush.

Removing stains from scarlet tunics.

In many cases stains may be removed by the part affected being rubbed with dry pipeclay and then well brushed with a clean brush. Should this fail to remove them the following mixture may be tried:—

$\frac{1}{3}$ ounce of salts of sorrel to $\frac{1}{2}$ a pint of boiling water.

$\frac{1}{3}$ ounce of cream of tartar to $\frac{1}{2}$ a pint of cold water.

Each solution should be kept in a separate flat vessel.

These quantities will be sufficient to clean 2 or 3 garments.

The garment which requires cleaning should be first well beaten and brushed, and a perfectly clean hard brush should be used in applying the solutions.

The solutions should be applied alternately commencing with the salts of sorrel, until the garment has been washed all over, and all the stains removed.

If the weather permit, the cleaned garments should be hung up in the sun to dry; if not, they should be hung up in a dry place, but not near fires or toves.

(7) CLAYMORE, OFFICER'S, HIGHLAND PATTERN. (Approved, 7th October, 1863.)

Sword.—The blade is straight and tapers gradually to a point, it is double fullered on both sides to a thickness of not less than .05 inch, both edges being ground to thickness of about .01 inch, commencing about 9 inches from the guard.

The mountings consist of guard, grip, ferrule, nut, pommel, washer, lining and tassel.

The guard, grip and ferrule are held in position by a nut screwed on the tang underneath the pommel, the pommel is held by a washer, the end of the tang being riveted over the washer.

The guard is of malleable cast-iron, of an open ornamental device; it is lined with white leather covered with crimson cloth and bound round the edge with blue silk ribbon, which is tied round the grip and scroll of the guard, the lining is detachable; a tassel of crimson silk fringe is fixed under the pommel.

The grip is of wood covered with fish skin and bound with silver wire; the length of the grip must be from 5 inches to $5\frac{3}{4}$ inches long, variation being allowed to suit the size of hand.

The blade may be plain or ornamentally embossed; in the latter case while it is not necessary that a uniform pattern or ornamentation should be followed, the design should not include any badge or device beyond the Royal Cypher and Crown, and the usual manufacturer's name or trade mark.

Swords of this pattern should withstand the following tests:—

Blade.—In the set and stiffened stage, struck on back and edge and on both flaps, on an oak block, by hand.

With a weight of 18 lbs. in the vertical machine, the blade should recover straightness after not less than 1 inch depression. In the same machine the blade should be shortened 5 inches by bending from right to left and then from left to right.

Hilt assembled.—Struck a moderate blow by hand on an oak block, back and edge, to test soundness of hilding.

Sword complete.—With a weight of 16 lbs. in the vertical testing machine it should recover straightness after not less than 1 inch depression.

Scabbard.—The scabbard is of steel. It is fitted with a German silver mouthpiece, with sputcheon brazed on and fixed to the scabbard with two screws. Two bands with loose rings are brazed on the scabbard $2\frac{1}{8}$ inches and 11 inches respectively, from the top of the mouthpiece. It is also fitted with round knobbed tip, brazed in the end.

The lining is of leather, blocked with flesh side in, turned, butted, and herring-bone stitched with fine waxed thread on the right side of the lining, and held in position by the sputcheon.

Length of Sword	3 feet $2\frac{5}{8}$ inches.*
„ „ Scabbard	2 „ $9\frac{5}{8}$ „
„ „ Blade from point to shoulder	2 „ $8\frac{7}{16}$ „
„ „ Sword and scabbard (with buff piece)	3 „ $3\frac{1}{16}$ „ *
Balance from hilt	$3\frac{1}{16}$ „ *
Weight of Sword	2 lbs. $8\frac{3}{4}$ ounces.*
„ „ Scabbard	1 lb. 1 ounce.
„ „ Lining	$1\frac{3}{4}$ ounces.

* These particulars will vary slightly according to the length of grip.

(8) SCABBARD FOR USE WITH "SAM BROWNE" BELTS.

Sealed 19th June, 1902.

The scabbard is built up with two strips of wood, grooved to receive blade of sword; they are butted and glued together.

The strips of wood are covered with brown leather, sewn down one side. A raised rib is formed below the locket by a piece of packing between wood and leather.

The body is made entirely of brown leather, including the chape. The supporter is attached to the rib of the scabbard to hold it at a proper height in the frog, and has a tab attached which buttons on the front of belt frog or the frog on shoe pocket and so prevents either upward or downward movement of the scabbard.

Length over all	2 feet 10 inches.
" of chape	7½ inches.
Weight of scabbard complete...	9½ ounces.

The pattern scabbard is to be regarded as typical only, as shape and dimensions may require to be varied according to the sword to be carried.

APPENDIX VII.

BELT AND SWORD KNOT (UNIVERSAL PATTERN).

(1) THE "SAM BROWNE" BELTS.

Sealed 24th April, 1900.

(Worn by officers of all branches of the service.)

The belts, complete, consist of a waist-belt, two shoulder-belts, a sword frog, an ammunition-pouch, and a pistol case; the whole made of brown bridle leather.

The waist-belt is 2½ inches wide, and of a length to suit the wearer. It is fitted with a double-tongued brass buckle, and has four brass dees for the shoulder-belts (two at the back, and one at each side), a running loop for the free end of the belt, two brass rings for attachment of the frog, and a hook for hooking it up. The waist-belt is lined with faced basil.

The shoulder belts are plain straps (crossed at the back through a loop). They are 1½ inches wide. The patterns are about 35 inches long over all, without chapes. The length, however, may be varied to suit the wearer. They are fitted with studs for attachment to the dees at the back of the waist-belt. A chape, with stud and a buckle, is provided for each, for attachment to the dees at the sides of the belt.

The strap over the left shoulder need not be worn, except when it is required to support the revolver.

The frog is fitted with two straps, which are to be passed through the dees on the lower part of the belt. The frog has a small brass dee on the top, to go over the hook on the belt when "hooking up." A stud is fitted on the front of the frog, upon which the tab of the scabbard supporter is fastened. (See description of leather scabbard).

A small strap for steadying the sword hilt is attached to the rear dee for the frog, holes being made in the strap to pass over a stud on the belt above the front dee.

The ammunition-pouch and pistol-case are fitted with loops on the back for attachment to the waist-belt; also with stud and tab fastenings. The loop on the pistol-case is furnished with a small brass hook, which should pass through a hole to be made for the purpose in the belt to suit the wearer, in order to secure the case and keep it in position.

The pattern pistol-case is to be regarded as typical only, as its dimensions must suit the particular pattern of pistol carried.

The "furniture" should be of the best yellow brass.

(2) WEB SWORD BELT.

This consists of a waist-belt and a shoulder suspender of worsted web, strengthened at various parts with black morocco leather. It is furnished with loops, chapes, and dees. The loops and chapes are of morocco leather, and the furniture of gilding metal.

The suspender is fitted with hooks so that it can be removed by officers wearing the web belt under the sash, outside the frock coat.

(3) WEB BELT AND BRIDLE LEATHER STRAPS FOR CARRYING GREAT COAT.

The belt is made from $2\frac{1}{8}$ -inch worsted web, and is strengthened at the eyelet holes by a light piece of leather. The coat straps are made from bridle leather, and the furniture of gilding metal.

(4) SWORD-KNOT (UNIVERSAL PATTERN).

The sword-knot to be used with the "Sam Browne" belt is the universal pattern of brown leather. It is a plain strap made of pig-skin, best bridle leather, or calf, the ends being secured into an "acorn" having plaited leather covering. It is furnished with a sliding keeper.

Length of strap in the double, 15 inches; width of strap, $\frac{5}{8}$ inch; length of acorn, $2\frac{1}{2}$ inches.

APPENDIX VIII.

WATER BOTTLE.

DESCRIPTION OF THE PATTERN WITH WHICH OFFICERS ARE RECOMMENDED TO PROVIDE THEMSELVES.

The bottle is made of pure aluminium, of the form and dimensions shown in the accompanying drawings:—

Bottle complete, with cover and sling.

Bottle uncovered.

It has a cork stopper attached by a short chain. The cork is held on a stem, tapped at the end to receive a small nut, so that the cork, which is of the size generally used for wine bottles, &c., may be readily renewed when necessary.

The bottle is covered with felt, and has a strap fixed around it, passing through four loops sewn on to the felt. The extremities of this strap, which are at the shoulders of the bottle, are provided with brass loops, through which the ends of the sling or carrier are passed. The sling is $\frac{5}{8}$ inch wide, and of suitable length for the wearer. It has a brass stud fixed near each end and a hole at the end to button on to the stud. The sling may therefore be worn under belts, so as to carry the bottle steadily, and the latter may be removed without disturbing the sling. The leather is all brown "best bridle."

Weight complete, about 14 ozs.

Capacity of bottle, $2\frac{1}{4}$ pints.
